

GREEN MAGIC

Sustainable mop made from recycled microfibre especially for structured floors

First class meets sustainability

The GREEN MAGIC is a sustainable polyester mop without outer fringe made of over 80% recycled material. Like our premium WHITE MAGIC mop cover, which was the inspiration for the GREEN MAGIC cover, this product also ensures an extremely high cleaning performance by optimally dissolving dirt on floors.

Whether textured coverings, safety tiles or fine stoneware tiles or high-gloss, water-sensitive coverings, this mop cover is the sustainable all-rounder for floor cleaning while maintaining the usual VERMOP quality.

The mop is available as SPRINT flat mop and TWIXTER / TWIX double mop.

The sustainable VERMOP products underline our determination to protect the environment.
