

# GREEN TRONIC

Sustainable mop for versatile use

The GREEN TRONIC is a sustainable mop consisting of over 65% high-quality recycled polyester/microfibre material and a high-quality polyester/cotton blend yarn.

It convinces in daily use with its excellent cleaning performance thanks to microfibre combined with good water absorption. This makes it an all-rounder suitable for various areas of use.

The mop is available as SPRINT flat mop and TWIXTER double mop.

The sustainable VERMOP products underline our determination to protect the environment.

– **Material:** 22% cotton, 78% PES/microfibre, tufted

– **Features:** loop
